Adjusted earnings before interest and income taxes (EBITA): EBIT (defined as the difference between charges and income that do not result from financial activities, equity affiliates, discontinued operations and tax) before the amortization of intangible assets acquired through business combinations and the impairment losses of goodwill and other intangible assets acquired through business combinations.

Adjusted net income, includes the following items: EBITA, income from equity affiliates, interest, income from investments, including dividends received from unconsolidated interests as well as interest collected on advances to equity affiliates and loans to unconsolidated interests, as well as taxes and minority interests related to these items. It does not include the following items: impairment losses of goodwill and other intangibles acquired through business combinations, henceforth, the amortization of intangibles acquired through business combinations, other financial charges and income, earnings from discontinued operations, provision for income taxes and minority interests relating to these adjustments, as well as non-recurring tax items (notably the change in deferred tax assets relating to the Consolidated Global Profit Tax System, and the reversal of tax liabilities relating to risks extinguished over the period).

Cash flow from operations: Net cash provided by operating activities after capital expenditures net, dividends received from equity affiliates and unconsolidated companies and before income taxes paid.

Financial net debt: is calculated as the sum of long-term and short-term borrowings and other long-term and short-term financial liabilities as reported on the consolidated statement of financial position, less cash and cash equivalents as reported on the consolidated statement of financial position, as well as derivative instruments in assets and cash deposits backing financing (included in the Consolidated Statement of Financial Position under “financial assets”).
